

Latest in Lighting | 2018 Summer

With summer comes the prospect of outdoor entertaining, dining on your deck, children playing outside into dusk, and you spending a lot of time in your garden.

As you spend the last weeks of spring making your garden and outdoor living spaces beautiful and inviting, remember that lighting plays a crucial role in creating the ideal atmosphere for whatever you use your outdoor spaces for.

1. Portable Lanterns

A simple and effective light fixture, portable lanterns are rechargeable, practical and can even double as a Bluetooth speaker so your favourite tunes can accompany your outdoor activities. They provide a soft light that works well in the dusk hours as you unwind in the garden on a warm summer night. Enhance your outdoor entertaining space with this subtle choice.

2. Outdoor Fire Bowls

Of course, nothing beats the scent and warmth of a real crackling fire, but for most of us, that isn't practical. Beautiful outdoor fire bowls are the perfect alternative, providing warm lighting to enhance your garden's atmosphere.

3. Landscape Lighting

Illuminate your outdoor space to both enhance safety and start using spaces you may have previously left untouched and dark. Exterior landscape lighting can perfectly light up a driveway, exterior staircases, fences, and entry ways.

4. Outdoor Chandeliers

Make a bold statement over your outdoor living space by installing a chic chandelier as a focal point to provide light and style.
